

MI Paste[®] ONE Kids

One Step Toothpaste with RECALDENT[®] Technology for Kids

Cleans and rebuilds enamel in one toothpaste for kids!

Since 1921

100 years of Quality in Dental

The MI Paste® Family

MI Paste® products are the essential solutions which release calcium, phosphate, and fluoride. They are the first of their kind – containing naturally derived milk protein and fluoride for safe and effective treatment of white spot lesions and non-cavitated tooth demineralization.

MI Paste® ONE Kids

The newest member of the MI Paste® family is a two-in-one application (toothpaste and MI Paste Plus®) containing RECALDENT® (CPP-ACP) and fluoride, in 3 delicious flavors:

MI Paste® ONE Kids is a great way for your patients to REMINERALIZE and REBUILD ENAMEL!

How to Use

1. Apply a small, pea-size amount of MI Paste® ONE Kids to your toothbrush.

2. For best results, brush for 2 minutes, expectorate and avoid rinsing and eating or drinking for 30 minutes after brushing. Use twice daily.

The effective delivery vehicle for Fluoride

When fluoride is used with RECALDENT® (CPP-ACP), the peptide preferentially combines with, and stabilizes, fluoride to create the ideal source for building fluorapatite. Using bio-available calcium and phosphate, the full potential of fluoride to help protect and repair teeth can be achieved.

MI Paste® ONE Kids

Contains: 10 tubes (46g each)

Every patient is different – with different teeth, preferences, and habits. Give your patients yet another option, so they can promote healthy teeth, with the power of the MI Paste® Family.

RECALDENT® (CPP-ACP) is derived from milk casein. Do not use on patients with a milk protein or hydroxybenzoates allergy. In case of allergic reaction, stop use, rinse mouth with water, and seek medical advice.
